Purposes of the Network Primer

• Provide real-time information & objective guidance (not legal advice) on emerging issues of law and policy
• Serve as a quick briefing on core legal preparedness and response issues
• Connect users to available documents and materials via hyperlinks
• Create a template for presentations or legal assessments in your jurisdiction
• Invite further questions or comments
Primer Contents

Brief Overview – COVID-19

Additional Resources

Questions & Comments
COVID-19 Epi Snapshot

Transmission:
- Initially-infected persons in Wuhan, China are linked epidemiologically to a large seafood/animal market.
- Transmissible person-to-person with potential infectivity rate exceeding annual influenza.
- Asymptomatic persons may infect others.
- Reproductive number \([R^0]\) estimated at 2.2.

Symptoms:
- Respiratory symptoms, fever, cough, breathing difficulties, aches, pains.
- In severe cases (~20%), infection can cause pneumonia, respiratory issues, kidney failure and death.

Vaccines, Tests & Treatment:
- No vaccines, rapid tests, or proven treatments are available.
COVID-19 Global Distribution

Total Confirmed Deaths >: 4,020
Total Confirmed Cases: > 114,240

= Mortality Rate 3-4%

WHO PHEIC Declaration – Key Guidance

**Organized Responses** | Engage in containment, active surveillance, early detection, isolation & contact tracing

**Data Sharing** | Share data with WHO via IHR legal requirements

**Prevention** | Focus on reducing human infection/secondary transmission

**Communication** | Engage in multi-sectoral communication re: knowledge & research

**Restrict Movement** | Restricting movement of people/goods may be temporarily useful under limited response capacities or intense cases

**Travel** | Inform WHO about travel measures as required by the IHR

**Discrimination** | Avoid actions promoting stigma or discrimination

**Developing Countries** | Support LMICs to enable their responses & facilitate access to diagnostics, vaccines & therapeutics

**Justification** | Justify health measures significantly interfering with international traffic

Emerging Legal Issues

US Emergency Legal Responses to Novel Coronavirus: Balancing Public Health and Civil Liberties

Click on image to access article

Lawrence O. Gostin, JD

James G. Hodge Jr, JD, LLM
Center for Public Health Law and Policy,
Sandra Day O’Connor College of Law, Arizona State University,
Phoenix.

With increasing numbers of cases of coronavirus disease 2019 (COVID-19) globally and in the United States, Health and Human Services (HHS) Secretary Alex Azar declared a national public health emergency on January 31.\(^1\) The emergency declaration of the HHS authorizes additional resources, enhanced federal powers, interjurisdictional coordination, and waivers of specific regulations. State and local public health emergency declarations are also likely. During crises, government has a special responsibility to thoughtfully balance public health protections and civil liberties.

Public Health Risk Assessment
While epidemiological data are evolving, human-to-human transmission of COVID-19 has been documented. The administration has declared federal public health emergency powers in response to COVID-19 beyond those used for previous health emergencies such as SARS, H1N1 influenza, and Ebola. The administration premised the exercise of federal powers on the need to avert “cascading public health, economic, national security, and societal consequences.”\(^4\)

Travel Warnings and Recall of Nonessential Personnel
Immediately following the emergency declaration of the HHS, federal agencies implemented travel warnings, entry bans, and border protections. On January 31, the State Department issued its strongest warning (“do not travel”) applying to mainland China.\(^5\) Additional warnings may take effect with “little or no advance notice.”\(^5\) Nonessential diplomatic, military, and other personnel

Balancing Individual & Communal Interests

**Emergency Preparedness and Response**
### Constitutionality of Selected, Potential COVID Emergency Responses

<table>
<thead>
<tr>
<th>Constitutional</th>
<th>Unconstitutional</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quarantine of individuals or groups suspected or known to be exposed to COVID</td>
<td>“Cordon sanitaire” or lockdown of groups or communities within or outside “hot zones”</td>
</tr>
<tr>
<td>Isolation of individuals who are known to be infected with COVID</td>
<td>Separation of persons based on mere suspicion of COVID infection without real-time confirmation</td>
</tr>
<tr>
<td>Travel recommendations to avoid specific U.S. jurisdictions based on known risks of infection</td>
<td>State or local travel bans or border closures that directly inhibit ingress or egress of U.S. citizens</td>
</tr>
<tr>
<td>Real-time medical triage decisions based on government recommendations grounded in epidemiologic and medical science</td>
<td>Real-time medical triage decisions based on specious grounds (e.g., race, ethnicity, religious affiliation, ability to pay)</td>
</tr>
<tr>
<td>Limited waivers of federal, state, or local statutory or regulatory laws impeding effective public health responses</td>
<td>Complete waiver of constitutionally-required due process, equal protection, or other rights</td>
</tr>
<tr>
<td>Reasonable testing or screening measures designed to mitigate exposure of others to COVID</td>
<td>Forced invasive testing of autonomous adults without a warrant based on probable cause</td>
</tr>
<tr>
<td>Accurate, real-time sharing of identifiable patient health information between medical &amp; public health authorities for surveillance purposes</td>
<td>Mass publication of identifiable patient health information absent compelling circumstances</td>
</tr>
<tr>
<td>Government acquisition of critical resources or property from private entities sector with reimbursement</td>
<td>Government “taking” of private sector property or resources without “just compensation.”</td>
</tr>
</tbody>
</table>
Multi-level Emergencies

Public health authorities, powers, liabilities & immunities vary depending on the type of emergency declared at each level of government.

<tr>
<th>Locality</th>
<th>Date</th>
<th>Select Authorizations</th>
</tr>
</thead>
</table>
| Clackamas County          | 3/2/20 | • Establish emergency policies and protocols  
• Recoup financial costs and redirect funds  
• “Order such other measures as . . . immediately necessary for the protection of life and/or property.” |
| County of Hawai‘i         | 2/28/20| • Sponsor and enter into mutual aid programs  
• Receive, expend & use contributions or grants; procure federal aid  
• Relieve and suspend hardships and inequities or obstructions to public health, safety or welfare |
| Solano County             | 2/27/20| • Department Operations Center to bolster identification & screening  
• Collaboration with local, state, and federal agencies to implement containment efforts |
| Orange County             | 2/27/20| • Reimbursements from county, state & federal partners if resources are exhausted  
• Agency coordination & resource leveraging |
| San Francisco City        | 2/25/20| • Mobilization of city resources & acceleration of emergency plans  
• Streamlining staffing and coordination agencies city-wide |
| San Diego County          | 2/19/20| • Reimbursement from state & federal governments  
• Increasing resources such as beds at local hospitals |
| Santa Clara County        | 2/10/20| • Leveraging state funds and mutual aid resources  
• Increasing resources such as protective gear and training for healthcare workers |
Addressing critical questions is complicated by changing legal dynamics during crises. Emergency powers depend on the type and duration of governmental declarations, which, in turn, may advance or impede CSC implementation.
Social Distancing Measures

- Control modes of transportation
- Increase distance among workers
- Restrict travel
- Dismiss schools
- Curfew
- Restrict public gatherings
- Evacuation
- Isolation & quarantine
Jan. 31: Trump Administration bans foreign national travel for those who have been in China within the last 14 days and who pose a risk.

Feb. 29: Administration bans foreign national travel for those who have been in Iran, as well as travel warnings re: Italy & South Korea.
March 8: Dr. Fauci intimates the possibility for regional lockdowns and recommends those at greatest risk (e.g., elderly, persons with chronic conditions) abstain from travel.

Select, constitutional implications of potential “lockdowns:”

- Sweeping limits on constitutional rights to travel face strict scrutiny to survive;
- State border closures (even in emergencies) subject to federal acquiescence;
- Municipal efforts to close borders subject to state interventions and overrides;
- “Cordon sanitaire” infringes substantive due process and equal protection rights that have negated prior attempts to lock down areas;
- Emergency powers allow for temporary closures, assembly limits, and evacuations, but lockdowns actually place many persons at greater risk of harm;
- Less restrictive alternatives include:
  - Strong incentives or messaging to avoid travel;
  - Mass closures of schools and public places;
  - Private entity decisions to temporarily close;
  - Screening of persons arriving or departing from public places; and
  - Mass quarantine or isolation measures.
- For additional insights, see the Health Affairs blog (3/10) by Lawrence O. Gostin
3/3: Young Israel of New Rochelle Synagogue (NY) closes

3/4: Ultra Music Festival (Miami) cancelled

3/5: Amazon staff working from home (WA)

3/5: Division III NCAA games cancelled/crowds banned

3/6: University of Washington suspends in-person class meetings

3/9: Boston’s St. Patrick’s Day Parade cancelled
School Closures

Feb. 16: CDC issues initial guidance intimating school mitigation, including possible closures, may be warranted

Mar. 4: Northshore School District outside of Seattle announces plans to close for 2 weeks; multiple other districts close as well

Mar. 10: NY Gov. Cuomo announces 2 week school closure in entire NYC district.

Explicit authority to close schools in non-emergencies is lacking in many states;

Significant variations exist regarding which levels of government and specific departments are authorized to close schools;

Authority to close schools shifts dramatically once a state of emergency is declared; and

Assessment criteria on the timing and appropriateness of school closure is largely absent

Click here to access article
Quarantine & Isolation

Quarantine
Separation from others of people exposed to a contagious condition prior to knowing if they may be ill or contagious

Isolation
Separation from others of people who are known to be infected, or capable of infecting others, with a contagious condition

For a listing of state-based quarantine and isolation statutes, see the link at the National Conference of State Legislatures
Jan. 31: CDC Director Robert Redfield orders a 14-day quarantine of nearly 200 persons arriving at a U.S. military base in California 2 days prior on an evacuation flight from Wuhan, China.

As of February 10, 4 additional flights amassing more than 800 Americans are under quarantine at 4 military bases.

Feb. 17: CDC quarantines 2 flights of over 300 Americans returning from the Diamond Princess cruise ship (in Yokohama, Japan) at Travis and Lackland Airforce Bases.

Feb. 23: President Trump blocks plans to quarantine persons at federal facility in Anniston County AL, amid litigation.
Jan. 23: Health officials require at home-isolation of Texas A&M student.
Jan. 26: AZ Dept. of Health Services oversee home isolation of ASU student.
Feb. 4: VA Dept. of Health requires 4 students to self-monitor at home for 14 days with daily check-ins.
Feb. 11: GA state health officials require nearly 200 Georgians to self-monitor at home for 2 weeks.
Mar. 2: In Oregon dozens of health care workers are placed on paid furlough and subjected to home quarantines.
Mar. 4: According to the CA Dept. of Health, more than 9,400 Californians have been asked to self-quarantine.
Feb. 28: After obtaining temporary restraining order to block the transfer of individuals exposed to or infected with COVID-19 to Costa Mesa, CA, feds drop their plans and case is dismissed.

March 2: City of San Antonio sues in federal district court to attempt to block CDC from releasing 120+ COVID evacuees from quarantine at Joint Base San Antonio-Lackland. The motion was denied.
Current & Prospective Civil Liability Claims

- Negligence/Malpractice
- Intentional Torts
- Privacy Infringements
- Discrimination
- Breach of Contract
- Worker’s Compensation
- Price Gouging
- Cruise Lines
Despite risks, many legal liability protections apply in routine events & declared emergencies, especially concerning health care volunteers, workers, and entities.
Screening & Testing: Transportation Hubs

AIRPORT PUBLIC HEALTH PREPAREDNESS AND RESPONSE: LEGAL RIGHTS, POWERS, AND DUTIES

This digest was prepared under ACPR Project 11-01, “Legal Aspects of Airport Programs,” for which the Transportation Research Board (TRB) is the agency coordinating the research. Under Topic 09-01, this digest was prepared by Leilah Baraza, Mel and Enid Zuckerman College of Public Health, University of Arizona, Tucson, AZ, and Elizabeth Hall-Lipsy, College of Pharmacy, University of Arizona, Tucson, AZ.

Background

There are over 4,000 airports in the country and most of these airports are owned by governments. A 2003 survey conducted by Airports Council International–North America concluded that city ownership accounts for 38 percent, followed by regional airports at 25 percent, single county at 17 percent, and multi-jurisdictional at 9 percent. Primary legal services to these airports are, in most cases, provided by municipal, county, and state attorneys.

Research reports and summaries produced by the Airport Continuing Legal Studies Project and published as ACPR Legal Research Digests are developed to assist these attorneys seeking to deal with the myriad of legal problems encountered during airport development and operations. Such substantive areas as eminent domain, environmental concerns, leasing, contracting, security, insurance, civil rights, and tort liability present cutting-edge legal issues where research is useful and indeed needed. Airport legal research, when conducted through the TRB’s legal studies process, either collects primary data that are not available elsewhere or performs analysis of existing literature.

Foreword

Modern air travel has frequently been cited as a leading cause for the rapid spread of disease within countries and internationally. Recent outbreaks of SARS, MERS, Ebola, and Zika have focused the debate on a number of issues surrounding air travel, including isolation and quarantine, restrictions on freedom of travel, and screening protocols. A number of issues expose the lack of clarity on the respective powers and duties of airport and airline personnel, governments (including federal, state, and local entities) and public health authorities, and the inefficient coordination and cooperation among local, state, national, and international stakeholders.

Numerous legal issues are associated with these inherent challenges, but through planning and coordination with relevant stakeholders they can be addressed. This digest addresses the legal issues concerning the measures to detect communicable diseases, regulations to control communicable diseases, methods for decontamination, emergency legal preparedness, privacy, and potential sources of liability. This digest provides a checklist that airport attorneys and other staff can use to help prepare, plan, and coordinate with their partners in response to a threat of a communicable disease.

This legal digest provides the background on multimodal or intermodal facilities. The history of the laws, rules, and regulations in this area are provided, as well as case studies to assist airport operators in understanding and navigating the complexity of multimodal developments.
March 3: Vice President Pence announces massive expansion of who is eligible for COVID testing: “Any American can be tested . . . subject to doctor’s orders.”
