COVID-19
Emergency Legal Preparedness Primer
As of March 26, 2020

James G. Hodge, Jr., J.D., L.L.M.
Peter Kiewit Foundation Professor of Law
Director, Western Region Office, Network for Public Health Law
ASU Sandra Day O’Connor College of Law
james.hodge.1@asu.edu
Primer Purposes

• Provide real-time information & objective guidance (not legal advice) on emerging issues of law and policy

• Serve as a quick briefing on core legal preparedness and response issues

• Connect users to available documents and materials via hyperlinks

• Create a template for presentations or legal assessments in your jurisdiction

• Invite further questions or comments
Contents

- COVID-19 Epi “Snapshot” & Global Spread
- Emergency Legal Preparedness/Response
  - International | Federal | State | Tribal | Local
- Public Health Emergency Powers
- Constitutional & Other Challenges
- Additional Resources
- Questions/comments
Transmission

- Transmissible person-to-person with potential infectivity rate exceeding annual influenza.
- Asymptomatic persons may infect others.
- Reproductive number \([R^0]\) estimated at 2.2.

Symptoms

- Respiratory symptoms, fever, cough, breathing difficulties, aches, pains.
- In severe cases (~20%), infection can cause pneumonia, respiratory issues, kidney failure and death.

Vaccines & Treatment

- No vaccines or proven treatments are available.
COVID-19 Global Distribution

Total Confirmed Deaths >: 22,184
Total Confirmed Cases: > 492,000

Mortality Rate 4.5%

US Cases of COVID-19

Total Confirmed Cases > 69,000  Total Deaths > 1040

Multi-level Emergencies

Public health authorities, powers, liabilities & immunities vary depending on the type of emergency declared at each level of government.
Jan. 30: WHO declares a public health emergency of international concern (PHEIC).

Mar. 11: WHO formally classifies COVID-19 as a pandemic.

Federal Emergencies/Invocations

- HHS Public Health Emergency: Jan. 31
- National Emergencies Act: Mar. 13
- Stafford Act Emergency: Mar. 13
- Defense Production Act: Mar. 20

Images: Department of Health & Human Services, Department of Homeland Security, FEMA
Jan. 31: HHS Sec. Alex Azar declares national public health emergency

- Frees up federal resources
- Encourages interjurisdictional coordination
- Allows waivers of specific federal laws
- Authorizes real-time countermeasures through emergency use authorizations
- Supports social distancing measures (e.g., travel or border limits, quarantine)
Mar. 13: President Trump declares dual emergencies via the National Emergencies Act and § 501(b) of the Stafford Act authorizing:

- Access to FEMA’s $50+ billion Disaster Relief Fund and reimbursement for eligible emergency protective response measures.
- Waivers under SSA § 1135 of select Medicare, Medicaid, S-CHIP, HIPAA Privacy Rule
- Additional types of federal assistance to states & localities
Select Congressional Responses

3/14
Families First Coronavirus Response Act provides paid sick/quarantine time & other benefits

3/4
House introduces “Coronavirus Preparedness and Response Supplemental Appropriations Act”

3/4
Congress passes $8 bill fund for Emergency COVID-19 response

2/13
Senators urge HHS to establish guidelines for how state & local governments are reimbursed for expenses

2/6
Senators request info. on VA health care facilities’ prevention & response efforts
Mar. 18: Families First Coronavirus Response Act signed by President Trump (effective date April 2):

- Requires private health plans to provide no cost coverage for COVID-19 diagnostic tests
- Temporarily increases federal portion of Medicaid
- Releases $ millions in assistance to domestic nutrition assistance programs (e.g., SNAP, WIC)
- Requires certain employers to provide employees 14 days of paid sick leave
- Releases an additional $1 billion in FY2020 emergency grants for unemployment insurance benefits

Presidential Powers and Response to COVID-19

Click on image to access

The Centers for Disease Control and Prevention (CDC) modeling suggests that, without mitigation, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), the virus that causes novel coronavirus disease 2019 (COVID-19), could infect more than 60% of the US population. President Trump has declared a national emergency along with 50 governors declaring state emergencies (Figure), which are unprecedented actions. Social distancing aims to flatten the epidemic curve to moderate demand on the health system. Consequently, whether through voluntary actions or state mandates, individuals are increasingly sheltering at home, schools and universities are closing, businesses are altering operations, and mass gatherings are being canceled. On March 16, the health officers of 6 local governments in the San Francisco Bay Area issued mandatory orders to shelter in place, making it a misdemeanor offense to leave home for any nonessential purpose. State and local responses are inadequate, but the extent of this authority has not been tested.  

Travel Restrictions
Recently, the president banned most non-US citizens from entry into the United States traveling from the Schengen area (an area comprising 26 European states that have officially abolished all passport and other types of border control), the United Kingdom, and Ireland, on top of existing bans from China and Iran. The CDC rarely issues advisories against travel to particular locations within the US and has not done so to date for COVID-19. The CDC last advised against domestic travel during the 2017 Zika outbreak, recommending pregnant women avoid travel to southern Florida. While the White House has policies for military and government personnel traveling to places experiencing high levels of COVID-19 cases, it has not, as of yet, restricted do-

Harris County Public Guidance - March 12, 2020

These steps are recommended until March 31, 2020 or until otherwise noted.

Guidance for People at Higher Risk for Severe COVID-19 Illness
People at higher risk of severe illness should stay home and away from large groups of people as much as possible, including public places with lots of people and large gatherings where there will be close contact with others. Gatherings of seniors or other people at higher risk of severe illness should be canceled or postponed.

Those at higher risk include:
- People 60 and older.
- People with underlying health conditions (e.g. heart disease, lung disease, diabetes)
- People who have weakened immune systems.
- Pregnant women.

Caregivers of children with underlying health conditions should consult with healthcare providers about whether their children should stay home. Anyone who has questions about whether their condition puts them at increased risk for severe COVID-19 illness should consult with their healthcare provider. Those without a healthcare provider should contact Harris Health’s Ask A Nurse line at: 713-634-1110.
Substantial change in usual healthcare operations and level of care due to a pervasive or catastrophic disaster.

Prospective Civil Liability Claims

- Negligence/Malpractice
- Intentional Torts
- Privacy Infringements
- Discrimination
- Worker’s Compensation
Despite risks, many legal liability protections apply in routine events & declared emergencies, especially concerning health care volunteers, workers, and entities.
Social Distancing Measures

- Control modes of transportation
- Increase distance among workers
- Dismiss schools
- Restrict public gatherings
- Isolation & quarantine
- Evacuation
- Curfew
- Shelter-in-place/ Lockdown
**Jan. 31**: Trump Administration bans foreign national travel for those who have been in China within the last 14 days and who pose a risk.

**Feb. 29**: Administration bans foreign national travel for those who have been in Iran, as well as travel warnings re: Italy, Japan & South Korea.

**Mar. 11**: President Trump institutes 30 day comprehensive travel ban for non-Americans arriving from EU, including the U.K. and Ireland

**Mar. 19**: U.S. closes border with Canada and Mexico to persons travelling for non-essential purposes, including tourism.
Mar. 26: “Governors Tell Outsiders From ‘Hot Zone’ to Stay Away as Virus Divides States”

Florida Governor Ron DeSantis orders 14 day quarantine against anyone arriving from NY in prior 3 weeks

Hawaii Governor David Ige recommends all travelers postpone trips for 30 days and imposes 14 day quarantine on arrivals

Alaska Governor Mike Dunleavy orders anyone (including residents) arriving in state to self-quarantine for 14 days
Framed in terms of “sheltering in place” or other broad proclamations, state and local orders seek to limit travel and out-of-residence activities to minimal levels to control disease spread.

While several exceptions to the scope of these measures apply, they rely on broad interpretations of social distancing powers, likely subject to judicial challenge.

</table>
Mar. 21: PA Governor Tom Wolfe rescinded in part his order for all “non-life-sustaining” businesses to close:
• Considerable disdain re: economic impacts
• Legal challenges via a law firm and gun store
• **New guidance** excepting timber industry, coal mining, hotels, accountants, laundromats & some law firms
• Allows “robust waiver process” for businesses seeking exemption
• **Will localities enforce?**
“Shelter in Place” Orders

Virtual “Lock Down?”

OR

Public Health & Safety Zone?
**Substantive due process** – hard to rationalize government responses restricting liberty that are not tied to known risks

**Equal protection** – explicitly tying travel restrictions to persons from specific regions of the U.S. raises questionable classifications

**Right to travel** – limiting ingress and egress, especially across state lines, implicates federal interests and fundamental rights

**Fundamental rights** – infringements require assessments of efficacious, less restrictive alternatives:
- Strong incentives/messaging to avoid travel;
- Closures;
- Screening, quarantine, isolation or other legit. measures
Voluntary Closures & Cancellations

Places of Worship

Employers

Universities

Events

Sports

Festivals
Feb. 16: CDC issues initial guidance intimating school mitigation could include possible closures
Mar. 4: Northshore School District outside of Seattle announces plans to close for 2 weeks
Mar. 10: NY Gov. Cuomo announces 2 week school closure for entire NYC district
Mar. 13: Multiple states (e.g., OR, IL, MD, NM) determine to close schools for select periods of time
School Decision Tree

All Schools Regardless of Community Spread

- Confirmed person with COVID-19 in building?
  - Assess Risk
  - Short (potential 2-5 Day) Building Dismissal to Clean/Disinfect/Contact Trace in consultation with local health officials

No Community Spread

- Prepare
- Teach and reinforce healthy hygiene
- Develop information sharing systems
- Intensify cleaning and disinfection
- Monitor for absenteeism
- Assess group gatherings and events – consider postponing non-critical gatherings and events
- Require sick students and staff stay home
- Establish procedures for someone becoming sick at school

Monitor changes in community spread

Minimal to Moderate OR Substantial Community Spread

- Coordinate with local health officials.
- Implement multiple social distancing strategies for gatherings, classrooms, and movement through the building WITH EXTENDED SCHOOL DISMISSALS.
- Consider ways to accommodate needs of children and families at high risk.

Is community spread Minimal to Moderate or Substantial?

M/M

School Closures – Legality

THE LEGAL LANDSCAPE FOR SCHOOL CLOSURES IN RESPONSE TO PANDEMIC FLU OR OTHER PUBLIC HEALTH THREATS

James G. Hodge, Jr.

- Explicit authority to close schools in non-emergencies is lacking in many states
- Significant variations exist regarding which levels of government and specific departments are authorized to close schools
- Authority to close schools shifts dramatically once a state of emergency is declared
- Assessment criteria on the timing & appropriateness of school closure is largely absent
Guidance as of 3/15/2020

Large events and mass gatherings can contribute to the spread of COVID-19 in the United States via travelers who attend these events and introduce the virus to new communities. Examples of large events and mass gatherings include conferences, festivals, parades, concerts, sporting events, weddings, and other types of assemblies. 

White House and CDC recommend no in-person events consisting of 10 or more people throughout the United States.

This recommendation does not apply to the day to day operation of organizations such as schools, institutes of higher learning, or businesses. This recommendation is made in an attempt to reduce introduction of the virus into new communities and to slow the spread of infection in communities already affected by the virus. This recommendation is not intended to supersede the advice of local public health officials.
Assembly Limits

• On what authority?
• By who specifically?
• At what level of government?
• In what specific setting or capacity?
• For how long?
• Consistent with 1st Amendment rights?
  • Free speech
  • Freedom to assemble
  • Freedom of religion
  • Reasonable limitations
Quarantine
Separation from others of people exposed to a contagious condition prior to knowing if they may be ill or contagious

Isolation
Separation from others of people who are known to be infected, or capable of infecting others, with a contagious condition

For a listing of state-based quarantine and isolation statutes, see the link at the National Conference of State Legislatures
Quarantine & Isolation - Illustrated

Quarantine

- Known, infected individual
- Individual exposed to contagious disease
- Healthy individual

Isolation

- Place of isolation or quarantine

The Network for Public Health Law
Jan. 31: CDC orders a 14-day quarantine of nearly 200 persons arriving at a U.S. military base in California 2 days prior on an evacuation flight from Wuhan, China.

Feb. 10: 4 additional flights amassing more than 800 Americans quarantined at 4 military bases.

Feb. 17: CDC quarantines 2 flights of over 300 Americans returning from the Diamond Princess cruise ship (in Yokohama, Japan) at Travis and Lackland Air Force bases.

Feb. 28: After obtaining temporary restraining order to block the transfer of individuals exposed to or infected with COVID-19 to Costa Mesa, CA, feds drop their plans and case is dismissed.

March 2: City of San Antonio sues in federal district court to attempt to block CDC from releasing 120+ COVID evacuees from quarantine at Joint Base San Antonio-Lackland. The motion was denied.
Option A: Temporary Quarantine or Isolation w/out Judicial Notice via Written Directive

Option B: Quarantine or Isolation w/Judicial Notice

Agency petitions court for an order authorizing Q or I of an individual or group specifying:

- identity of the individual(s) or groups;
- premises subject to Q or I;
- date and time at which Q or I commences;
- suspected contagious disease;
- statement of compliance with conditions and principles; and
- statement of the basis upon which such intervention is justified.

Notice

Hearing: held in proximity of petition, absent extraordinary circumstances.

Order: if, by clear and convincing evidence, Q or I shown to be reasonably necessary to prevent or limit the transmission of a contagious or possibly contagious disease to others.

Screening & Testing: Transportation Hubs

AIRPORT PUBLIC HEALTH PREPAREDNESS AND RESPONSE: LEGAL RIGHTS, POWERS, AND DUTIES

This digest was prepared under ACRP Project 11-01, “Legal Aspects of Airport Programs,” for which the Transportation Research Board (TRB) is the agency coordinating the research. Under Topic 09-01, this digest was prepared by Leilah Barraza, Mel and Enid Zuckerman College of Public Health, University of Arizona, Tucson, AZ, and Elizabeth Hall-Lipsy, College of Pharmacy, University of Arizona, Tucson, AZ.

Background

There are over 4,000 airports in the country and most of these airports are owned by governments. A 2003 survey conducted by Airports Council International—North America concluded that city ownership accounts for 38 percent, followed by regional airports at 25 percent, single county at 17 percent, and multi-jurisdictional at 9 percent. Primary legal services to these airports are, in most cases, provided by municipal, county, and state attorneys.

Research reports and summaries produced by the Airport Continues Legal Studies Project and published as ACRP Legal Research Digests are developed to assist these attorneys seeking to deal with the myriad of legal problems encountered during airport development and operations. Such substantive areas as eminent domain, environmental concerns, leasing, contracting, security, insurance, civil rights, and tort liability present cutting-edge legal issues where research is useful and indeed needed. Airport legal research, when conducted through the TRB’s legal studies process, either collects primary data that are not available elsewhere or performs analysis of existing literature.

Foreword

Modern air travel has frequently been cited as a leading cause for the rapid spread of disease within countries and internationally. Recent outbreaks of SARS, MEIS, Ebola, and Zika have focused the debate on a number of issues surrounding air travel, including isolation and quarantine, restrictions on freedom of travel, and screening protocols. A number of issues expose the lack of clarity on the respective powers and duties of airport and airline personnel, governments (including federal, state, and local entities) and public health authorities, and the insufficient communication and coordination among local, state, national, and international stakeholders.

Numerous legal issues are associated with these inherent challenges, but through planning and coordination with relevant stakeholders they can be addressed. This digest addresses the legal issues concerning the measures to detect communicable disease, regulations to control communicable diseases, methods for decontamination, emergency legal preparedness, privacy, and potential sources of liability. This digest provides a checklist that airport attorneys and other staff can use to help prepare, plan, and coordinate with their partners in response to a threat of a communicable disease.

This legal digest provides the background on multimodal or intermodal facilities. The history of the laws, rules, and regulations in this area are provided, as well as case studies to assist airport operators in understanding and navigating the complexity of multimodal developments.

PUBLIC TRANSIT EMERGENCY PREPAREDNESS AGAINST EBOLA AND OTHER INFECTIOUS DISEASES: LEGAL ISSUES

This report was prepared under TCRP Project J-05, “Legal Aspects of Transit and Intermodal Transportation Programs,” for which the Transportation Research Board is the agency coordinating the research. The report was prepared under Topic 16-G3 by Trudy C. Henson and Megan Timmons, University of Maryland Center for Health and Homeland Security. James B. McDaniel, TRB Counsel for Legal Research Projects, was the principal investigator and content editor.

The Problem and Its Solution

This report examines research and current legal issues to develop a framework for integrating the concept of public transit emergency preparedness into the existing framework of preparedness activities at the local, state, and federal level. The report addresses the following: the legal implications of emerging infectious diseases and their preparedness; the role of local and state governments in preparedness; the role of federal departments and agencies in preparedness; the legal implications of preparedness; and the legal implications of preparedness.

The legal implications of preparedness are addressed within the context of legal issues related to preparedness, such as the role of federal, state, and local governments in preparedness, the role of federal, state, and local governments in preparedness, and the legal implications of preparedness.

The report examines the legal implications of preparedness and their role in preparedness activities. The report identifies key legal issues related to preparedness, such as the role of federal, state, and local governments in preparedness, the role of federal, state, and local governments in preparedness, and the legal implications of preparedness. The report also examines the legal implications of preparedness and their role in preparedness activities.

The report identifies key legal issues related to preparedness, such as the role of federal, state, and local governments in preparedness, the role of federal, state, and local governments in preparedness, and the legal implications of preparedness. The report also examines the legal implications of preparedness and their role in preparedness activities.

The report identifies key legal issues related to preparedness, such as the role of federal, state, and local governments in preparedness, the role of federal, state, and local governments in preparedness, and the legal implications of preparedness.
